## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- a.) Group 1, claim(s) 51, 55-105, drawn to a method and apparatus involving selective and deliberate reflecting of transmitted signals.
- b.) Group 2, claim(s) 52, 53, 106, 107-186(s), drawn to a method and apparatus for binary signaling involving opposite voltage excursions for signal processing purposes.

The claim groups 1 and 2 involve totally different concepts which would involve a search of at least two different classification.

2. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.
